

VPFlowTerminal

The VPFlowTerminal is a plug & play wall mount display with built-in power supply and 2 million point data logger. The VPFlowTerminal has five sensor inputs: one input for a VPFlowMate or VPFlowScope mass flow meter, and four generic analog inputs and can record up to 8 channels. This makes the collection and analysis of your compressed air data easier and quicker!

- > 4 analog input channels

Applications

Efficiency: monitoring the efficiency of you compressor system. Measure with the VPFlowScope in the main pipe line of your system and measure with 4 power meters the power consumption of each compressor.

Air audits: the VPFlowTerminal can be used for air audits since you collect all data within one data logger. This makes the data collection, read out and analysis very convenient. Total package: Measure flow together with dew point, pressure and power consumption.
